A Product Family is typically defined as up to 5 products sufficiently similar that final manufacturing and/or assembly can reasonably be carried out at the same facility. A group of products with variations only in color, length, or similar simple features are considered to be the same product for this purpose. Ki Global Solutions reserves the right to determine, on a case-by-case basis, what does and does not constitute a family of products for purposes of providing our services.

KiPurchasing always requires a signed supply contract for the products under management, including NDA/NCA.
